BILLING DEMAND

The Coincident (Summer) Demand Charge for the year shall be the average of the customer's highest peak demand contributions to the peak periods as signaled by the Cooperative during June, July, and August which are used by Dairyland Power Cooperative to establish the Cooperative's wholesale Annual Demand Charge.

The customer's coincident summer billing demand will be charged on the October bill of each year.

The Coincident (Winter) Demand Charge for the year shall be the average of the customer's highest peak demand contributions to the peak periods as signaled by the Cooperative during December, January and February which are used by Dairyland Power Cooperative to establish the Cooperative's wholesale Annual Demand Charge.

The customer's coincident winter billing demand will be charged on the May bill of each year.

The customer will be alerted to potential peak periods one-half hour in advance of the potential peak period.

The Maximum (Monthly) Demand Charge shall be the maximum kilowatt demand established by the Consumer in any fifteen minute period during the month for which the bill is rendered.

COINCIDENT DEMAND ADJUSTMENT

The above rate's coincident demand charge shall be increased or decreased by a factor of 1.09 times any increase or decrease in the wholesale rate of Dairyland Power Cooperative applicable to

service to the Cooperative. The wholesale rate used in establishing the above base rate is as follows:

Demand Charge:	
Summer Peak (Causation) Component	\$55.00 per kW
Winter Peak (Causation) Component	\$25.00 per kW

POWER COST ADJUSTMENT

The above rate shall be increased or decreased per kilowatt hour by any Power Cost Adjustment or Rate Surcharge on the current month Cooperative wholesale power bill multiplied by a factor of 1.06 to adjust for line losses.
