**CHIPPEWA VALLEY ELECTRIC COOPERATIVE
MEMBER AGREEMENT
INTERRUPTIBLE SERVICE - WATER HEATER**

This agreement made and executed _____ Date _____ by and between Chippewa Valley Electric Cooperative, headquartered in Cornell, Wisconsin (hereinafter referred to as the 'Cooperative'), and

_____ Member Name _____ (hereinafter referred to as the 'member').

It is agreed by and between the parties as follows:

1. The participant must have installed, powered on and operating, a 50 gallon, or larger, electric water heater to be used for residential or commercial water heating or for water heating in a milk house or milk parlor, and specifically excludes tankless, or "on demand" electric water heaters.
2. The Cooperative shall furnish and install all control devices on the outside of the structure which shall remain the property of the Cooperative. The Member shall permit the Cooperative and its agents and employees to enter upon premises for purpose of installing, maintaining, relocating, repairing, replacing and removing said devices and appurtenances thereto.
3. The Cooperative shall have the authority to interrupt service taken under the selected Interruptible Rate Schedule, recognizing that the Cooperative may modify the terms and conditions of the selected Interruptible Rate Schedule from time to time as required by its load characteristics.
4. If the Cooperative determines or suspects that electric energy usage has not been consistent with this Agreement, Interruptible Rate Schedule, service rules or specifications, all control devices may be removed and all electric service billed under the general rate schedule. Only active, monthly billed, residential accounts, where the control device is installed, and **purchased at least 500 kilowatt hours per month, may qualify for the monthly \$3.00 credit.**
5. The Cooperative shall not be liable for any economic loss or personal discomfort due to the operation of the control device or the period of the service interruption.
6. Problems occurring with controlled loads shall be analyzed and corrected by an electrician. The member shall immediately notify the Cooperative if the control device is not functioning. The Cooperative will reimburse the homeowner or electrician for reasonable costs, only if the problem was with the control device.
7. If the control device is removed by the Cooperative and the interruptible rate discontinued for any reason, twelve months shall elapse before the control device and interruptible rate can be used by the Member again.
8. This Agreement shall be in effect upon the date it was executed until cancelled by either party at any time after one year from the date of this contract, for any reason. If member requests removal from Interruptible Service program before 12 months have passed, member will forfeit the water heater rebate and be invoiced for that rebate amount.
9. This Agreement shall be binding and inure to the benefit of the successors, legal representatives and assigns of the respective parties.
